3. Read the following passage and answer the questions below. 5X3=15

Before the war American International Civil Aviation was symbolized by Pan American Airways, which had been developed by its dynamic president Juan Trippe from a single service in 1927 into the dominant international carrier. Under Trippe's direction and with the help of friends and supporters in Congress, in the 1930s Pan Am expanded through Latin America, to Europe via the Azores and Portugal, and across the Pacific. And, while wartime developments either destroyed or forced most European international carriers to drastically cut their services, Pan Am continued to expand thanks, in part, to War Department contracts to construct bases in Latin America and the West Indies and to establish an air route to Africa via South America. By 1939 Pan Am was the largest international airline in the world and its route system totaled more than 60,000 miles; two years later it surpassed 98,000 - more than all of the European services combined. Looking to the postwar period, Pan Am sought to entrench its position - despite being privately owned - as America's 'chosen instrument' in international aviation.

Questions:

- a) Who is Juan Trippe?
- b) What is the contribution of Pan Am?
- c) Why did Pan Am seek to entrench its position despite being privately owned?
- d) Why is the date 1939 important?
- e) What did Pan Am do in 1930s?
