| Legal Status: | <ul style="list-style-type: none">• Civil Aviation Act, 2015 (1959 AD) - Statutory Regulations• Civil Aviation Authority Act, 2053 (1996) - Establishment |
| Main Functions: | <ul style="list-style-type: none">• Permitting Airlines Operation• Airworthiness Certification and Manpower Licensing/Rating• Regulating Air Transport, Air Navigation Services (ATM/CNS), and Aerodromes as per ICAO SARPs.• Constructing, operating and maintaining airports• Equipping and maintaining airports with necessary communication and navigational facilities• Operation of safe, efficient & expeditious flight. |
| Affiliation/Institutional Linkages: | Ministry of Culture, Tourism & Civil Aviation, Ministry of Information & Communication, Ministry of Home Affairs, Ministry of Finance, Ministry of Defence, Ministry of Science, Technology and Environment, ICAO, COSCAP-SA, Airlines, NTB, International Funding Agencies, Travelling Public. |
| Income Resources: | Landing, Parking, Housing, Over-flying and Route Navigation Charges, Security Charges, Charter Charges, Flight Catering Charges, Passenger Service Charges, Concessionaries; Parking of Surface Transport, Fee from Visitors Deck, Hoarding and Displays, Fuel Refueling Charges, Rental from airlines and other Agencies, Penalty Charges, Royalty and Others Deposits, Cargo Complex and Manpower Training, Regulatory fees, Ground Handling Charges, etc. |

Aviation History in Brief

- | | | | |
|-------|---|-------|--|
| 1949: | The date heralded the formal beginning of aviation in Nepal with the landing of a 4 seated lone powered vintage beach-craft Bonanza aircraft of Indian Ambassador Mr. Sarjit Singh Mahathia at Gauchar. | 1990: | New International Terminal Building of TIA inaugurated by king Birendra. |
| 1950: | The first Charter flight By Himalayan Aviation Dakota from Gouchar to Kolkata. | 1992: | Adoption of Liberal Aviation Policy and emergence of private sector in domestic air transport. |
| 1955: | King Mahendra inaugurated Gauchar Airport and renamed it as Tribhuvan Airport. | 1993: | National Civil Aviation Policy promulgated |
| 1957: | Grassy runway transformed into a concrete one. | 1995: | Domestic Terminal Building of TIA and Apron expanded at TIA. |
| 1957: | Department of Civil Aviation founded. | 1998: | COSCAP-SA Project established. |
| 1958: | Royal Nepal Airlines started scheduled services domestically and externally | 2002: | Expansion of the International Terminal Building at TIA and the construction of a new air cargo complex. |
| 1959: | RNAC fully owned by HMG/N as a public undertaking. | 2003: | Rara airport (Mugu), Kangeldanda airport (Solukhumbu) and Thamkharka airport (Khotang) brought in operation. |
| 1960: | Nepal attained ICAO membership. | 2004: | Domestic operation by jet aircraft commenced. |
| 1964: | Tribhuvan Airport renamed as Tribhuvan International Airport. | 2005: | International flight by two private operator began |
| 1967: | The 3750 feet long runway extended to 6600 feet. | 2006: | A new comprehensive Aviation Policy introduced. GMG Airlines of Bangladesh, Korean Air and Air Arabia started air service to Nepal. |
| 1967: | Landing of a German Airlines Lufthansa Boeing 707. | 2007: | Identification of site location for a new second international airport. Etihad, Dragon Air, Silk Air, Orient Thai and Hong Kong Express commenced their service to Nepal. |
| 1968: | Thai International starts its scheduled jet air services. | 2009: | Established of RCAG station at Nepalganj to augment coverage of VHF communication in Air Traffic Control. |
| 1972: | Nepalese jet aircraft Boeing 727/100 makes a debut landing at TIA. ATC services taken over by Nepalese personnel from Indian technicians. | 2010: | An agreement of SDR 44388000 was signed between Nepal Government and CAAN for Capacity Enhancement Project of TIA under ADB loan. |
| 1975: | TIA runway extended to 10000 feet from the previous 6600 feet. | 2011: | Tumlingtar and Simikot runways paved. |
| 1975: | CATC established. | 2012: | RNP AR Procedures of TIA effected from June. AMHS commissioned in Civil Aviation |
| 1976: | FIC (Flight Information Center) established. | 2013: | CAA received TRAINAIR PLUS Associate Membership from ICAO Installation of CNS & ATM Equipments at TIA are under Progress to enhance ATC Capacity |
| 1977: | Nepal imprinted in the World Aeronautical chart | | |
| 1989: | Completion of International Terminal Building and first landing Concorde. | | |

CAAN Board of Directors

Pursuant to CAAN Act - 2053

COMPOSITION

Mr. Ram Kumar Shrestha

Chairman

Hon'ble Minister,

Ministry of Culture, Tourism and Civil Aviation

Mr. Suresh Acharya

Member

Joint Secretary,
Representative

Ministry of Culture, Tourism and Civil Aviation

Mr. Surya Acharya

Member

Director General, Custom Department
Representative of Ministry of Finance

Mr. Jyoti Adhikari

Member

Nominee

(From among the Private Entrepreneurs involved in
Tourism industry)

Er. Phurba Tshering Sherpa

Member

Nominee

(From among the Aviation Expert)

Mr. Madan Kharel, MD, NAC

Member

Nominee

(From among the Airlines including Private
Operators)

Mr. Manoj Karki

Member

Nominee

(From among the Airlines including Private
Operators)

Er. Ratish Chandra Lal Suman

Member Secretary

Director General, CAAN

DIRECTOR GENERAL'S REVIEW

Er. Ratish Chandra Lal Suman
Director General

The year 2013 was significant in many ways and I have the pleasure in presenting the annual report with the highlights of our scope, activities and achievements during that period.

The air traffic growth in 2013 was very impressive. The number of international aircraft movements at Tribhuvan International Airport (TIA) was 17049 till September 2013 against 16990 in 2012 till September which shows a 0.35% growth over that in the previous year. The international passenger movement also shows a tremendous growth this year with movement of 2253450 passengers in 2012 (till September) against 2090236 in 2013 (till September). The overall passengers grew by 7.81% this year than the previous year.

We have made remarkable progress in the field of aviation with a lot more improvement in the domestic service and increment of overall air connectivity. Infrastructural improvements and equipment modernization have gained pace such that even the airports at remote areas are providing service for the whole year through. Twenty five international operators from fifteen different countries have been operating in Nepal. This number has been increasing every year. The air transportation data of past five years reveal that the increase in passenger flow has been 14.7% in the international sector and 10.7% in the domestic sector against the ICAO data of mere 4.9% movement of passenger altogether.

This is just a glimpse of the growth trend at TIA. Given the trend, the civil aviation sub-sector will be a tremendously growing industry in the overall tourism and economic arena of Nepal.

As one of the Contracting States of ICAO, Nepal remains ever adhered to its prescribed norms. Remaining within the framework of the rules laid down by ICAO, we abide by the government policies and rules. We have been following the Civil Aviation Policy 2063 and we will continue to encourage the private sectors to focus not only in the lucrative sectors but also in the remote sectors and meet their social obligation.

Production, retention and transformation of skilled personnel are some of the burning issues that we all have to account for. To address this issue, employees of CAAN are being trained abroad as well as locally. Besides, Civil Aviation Academy has been producing trained personnel for air traffic services, radio-electronics maintenance, flight dispatch, security, rescue and fire fighting services for the management of operations. Now, it is high time to adopt suitable technology and implement process for producing trained technical manpower regularly in order to meet the requirement of CAAN. Realizing this fact, we are adopting an extensive Human Resources Policy and a broad Human Resources Plan which is believed to aid us in uplifting the quality of human resources and retaining them in the organization.

Considering the rapidly growing traffic, CAAN is concerned with improvement and expansion of Tribhuvan International Airport. We are hoping for an overall improvement made to meet the new air traffic growth trend with the completion of the TIA Improvement Project. Besides, the project is considered to carry out studies on organizational and management aspects of CAAN. It would be an important support for us in the process of complete separation of regulatory and service provider functions of CAAN.

ICAO Coordinated Validation Mission (ICVM) carried out from 10-16 July 2013 has revealed that there has been a decrease in non-compliance percentage from 57% in 2009 to 45% in 2013 compared to global average of 39 percent. We have been putting our best to reduce the non-compliance rate to below the global average within a few months.

We have been making heavy investments on airport infrastructure development, installation and maintenance of navigational aids and overall management of airports but our challenge is to ensure regular and reliable air transport to the mountain communities and we plan to strive for the same in the coming days. We are committed to increase the accessibility and affordability of air transport to benefit the marginalized communities and travellers at large by remaining ever interactive with the government, industry partners, donors and local people, while reinforcing our regulatory mechanism for safe, efficient, and secured aviation services.

The government and CAAN are keen to be more flexible on increasing air seats and frequencies. Nepal has so far reached air service agreement and MOUs with 36 countries. CAAN is committed to co operate the Government for the maximum utilization of seats.

It will be pertinent to mention that the Government of Nepal observed the international civil aviation day on 7th December of 2013 with the ICAO mandated theme of 'Evolving to meet the challenges of twenty first century air transport.'

CAAN has introduced Safety Management System with launching of vigorous safety awareness campaign including workshops, seminars and trainings. Recently CAAN organized two seminars namely 'Risk Assessment and Mitigation' and 'Hazard Identification and Risk Assessment' in collaboration with IFC, World Bank and COSCAP respectively.

CAAN, as a service provider as well, has responsibility to fulfill public demands. Hence, we are set to strengthen domestic airports in respect of basic infrastructure with cooperation and support of the government and local people. Our focus for the coming days will be to speed up the up gradation of other domestic airports including the remote airports which have high tourism and regional development potential, and restoration of damaged airport infrastructures.

With regards to social responsibility, CAAN has made significant contribution to civil society living at the vicinity of TIA. Under its budget, CAAN has constructed outer perimeter road from the junction between old highway and jadibuti road to Gujhewori Temple and also a road outside the inner fence at the South Eastern side of runway. Similarly, CAAN completed the relocation and construction of Nageswor Temple at the Eastern side of Runway in its own land at Pepsicola area. Moreover, works like security Chain Link Fencing at VOR/DME, Koteswor, airport Drain Improvement at Bansjhari improvement of Gothatar Road together with the outer Perimeter Road at the Eastern side of Airport are under construction.

In addition, TIA has provided land at the south eastern side of runway for the construction of deep tube wells for Kathmandu Water Supply Company Limited and the Company has already distributed drinking water to Koteswor area people.

Finally, we would like to express our thanks to the government of Nepal, ICAO, and all stake holders, donors, and industry partners for their contribution to the activity of CAAN. We are confident we will be receiving your continued support in the days ahead.

I am proud of the outstanding performance, professionalism and commitment my colleagues have demonstrated in formulating and developing regulatory documents, while also carrying out their duties throughout the year.

I hope the report will prove resourceful and would like to thank the dedicated members of the Publication Committee for the preparation and publication of this report.

Er. Ratish Chandra Lal Suman

Highlights of the year

Air Traffic Management

1. WGS-84 Coordinates data survey of 6 major domestic airports namely Chandragadi, Pokhara, Surkhet, Bharatpur, Janakpur and Dhangadi have been completed and forwarded to Department of Aerodrome safety and Standards and in the process of approval in order to publish in AIP Nepal.
2. Determination of annual change in magnetic variation and verification have been completed in TIA, Biratnagar, Simara, Bhairahawa and Nepalgunj Airports. Determination of Magnetic Variation work was also carried out in Chandragadi and Dhangadi Airports. The magnetic variation of Nepal has been published in the AIP Nepal.
3. Survey was also done to prepare Obstacle Limitation Surface (OLS) chart and ICAO type A and Type B chart for major domestic airports Biratnagar, Bhairahawa, Nepalgunj and Simara. The data was sent to department of aerodrome safety and standards for comments and verification.
4. WGS-84 co-ordinates data survey of Biratnagar, Bhairahawa, Nepalgunj and Simara will be carried out in this fiscal year.
5. Instrument Flight Procedures of Bhairahawa reviewed and transition from one holding to another has been prepared to ease the traffic flow as well as controller's smooth handling of the traffic.
6. Manual of standards Air Traffic Services MATS, Nepal First Edition 2013 has been approved and issued which came into force from April 2013.
7. TIA, ATS Operation Manual was prepared and approved in June 25, 2013 by DGCA Nepal and came in force from July 09, 2013.
8. As per the new Organization Structure of ATM Department, Job Description (JD) of all the personnel has been prepared and approved by DGCA Nepal.
9. Till date Eight (8) ATC personnel were sent to ICAO/FPP Beijing for instrument flight procedure design training course and 4 persons were sent for PBN procedure design training course. All together 12 ATC personnel are trained for Basic/Advance instrument flight procedure design.

AMHS in TIA

Asia/Pacific Air Navigation Planning and Implementation Regional Group (APANPIRG), adopted strategy for implementation of AFTN/ATN transition plan in Asia and Pacific regional countries and circulates the transition plan of changing existing AFTN system to Air Traffic Service Message Handling System (AMHS) in the ground to ground ATN network.

Tribhuban International Airport installed the Automatic Message Switching System (AMSS) at 2000 and due to the aging, unavailability of spare parts and unsupported condition from manufacturing company it was very difficult to operate the system smoothly. So with the help of international consultant Airways International New Zealand, Civil Aviation Authority of Nepal prepared the detail design and technical specification of AMHS and

after tendering process with International Competitive Bidding mechanism, agreement with Comsoft GmbH Germany was accomplished at 14th February 2012, at a cost of approximate NPR 90 Million for the installation and commissioning of AMHS at Tribhuwan International Airport.

ICAO has strictly circulated to its contracting states to implement the ICAO New Flight Plan Format from November 15, 2012 and it was not possible from the operation of old technology AMSS system. The new AMHS was installed and operational from November 2012 and CAAN was successful to use new ICAO Flight Plan format.

The AMHS system has the international connectivity with communication center Mumbai and Beijing in IP based system. It is possible to transmit more than 1800 characters of message and meteorological information in graphical format in AMHS, which was the limitation in traditional AFTN system.

The computer terminals (User Agent) are installed in 10 airports, like, Chandragadhi, Biratnagar, Janakpur, Simara, Lukla, Nepalganj, Bhairahawa, Pokhara, Surkhet and Dhangadhi. By these computer terminals it is possible to communicate the departure message, meteorological message and other aeronautical messages in data form ie data communication to TIA or exchange of messages to other airport having user agent terminals. The noise due to the inherent characteristic of HF communication and ionospheric effect in environmental condition can be prevented by the use of data communication by AMHS terminals. In future, it is planned to connect more airports in aeronautical data communication network of AMHS.

Modernizing Surveillance System at TIA

The Government of Japan through Japan International Cooperation Agency (JICA) provide a grant assistance of Japanese Yen 989 Million to the Government of Nepal for the implementation of the Tribhuwan International Airport Modernization Project. The Exchange of Note regarding the implementation of the project was signed between Government of Nepal and Government of Japan, and the Grant Agreement to this effect was signed between the Government of Nepal and Japan International Cooperation Agency in 27 March, 2013.

Since the frequent problem has been encountered in the existing RADAR Surveillance and communication System at Tribhuwan International Airport due to the aging of equipments and non availability of spare parts, this assistance will be used for the replacement and enhancement of the existing surveillance system so as to enhance flight safety and airport capacity of TIA by improving reliability, efficiency and coverage of Radar Surveillance System to cope the increasing movement of aircraft at TIA in recent years.

The project incorporates

- (i) Expansion of the TIA surveillance system coverage by installing Monopulse Secondary Surveillance Radar System (MSSR) at the TIA for terminal approach aircrafts (TMA) and at Bhattedanda, Lalitpur for enroute aircrafts.
- (ii) Replacement of existing Radar Data Processing and Display System installed at TIA.
- (iii) Radar Simulation for Air Traffic Service.

This project will be implemented at the Fy 2013-2014 and will complete at 2015 March.

Under this project, CAAN has to develop the infrastructure in Bhattedanda Radar site which are:

1. Construction of access road to top of Mt. Bhattedanda. It is 3.5 KM of distance from TinpaneBhanjyang to the top of the Bhattedanda with 5m wide gravel road. For the construction of road, 2 hectares of land will be used and 55 trees should be cut out.
2. Construction of Radar building, staff quarter, guard quarter and Generator shade at Mt. Bhattedanda radar site.
3. Preparation of commercial power for Mr. Bhattedanda Radar site.
4. Construction of new MSSR Antenna Tower at TIA Radar site.

For the construction of road to Bhattedanda, tender has already float with detailed designed and will start the construction after Forest Ministry give permission to cut the tree which is in process. Other construction will be started after preparation of the access road.

Civil Aviation Academy

1. Civil Aviation Academy Nepal got associated membership of ICAO TRAINER PLUS in April 1 2012. In order for the Academy to acquire full membership it has to prepare Draft Standardized Training Package (STP) of "Basic AMHS Training for Aviation Personnel". Further, the Academy is in the process of appointing ICAO valuator for STP validation.
2. Civil Aviation Academy prepared "Strategic Plan of Civil Aviation Academy of Nepal fiscal year 2013-14 to 2017-18 and presented it before the management committee of Civil Aviation Authority of Nepal (CAAN) on October 30, 2013 and the meeting gave nod in principle to the proposal which is being implemented in phase-wise manner.
3. A five-member taskforce has been formed to implement National Civil Aviation Academy 2070 (Roadmap for CAA Transformation) prepared by the Civil Aviation Academy as per the decision of CAAN on September 27, 2013.
4. CAAN Directive 2070 (first edition) which is a revised version of CAA Training Directive 2064 is in the process of implementation.
5. Examined Personal Language Proficiency of 300 aviation officials (Pilot and Air Traffic Controllers) to meet requirements set by ICAO Aviation English Language Proficiency till December 2013.
6. Successfully operated pre-board passenger screening training-90 hours after fixing computer based x-ray training simulator.
7. The maintenance and upgrade under ATC Training 3D simulator system of the Civil Aviation Academy is in process of implementation.
8. The process for further construction of CAA's Radar Training building located at Sanothami is in final stage.

9. The CAA's six-month long training on AAA-001 (ATC Licensing, Aerodrome Control &AFIS) is underway.
10. ARFF's (Aerodrome Rescue & Fire Righting) 005 basis training has been held.
11. The notice published for AAA-002 /ARFF-006 and is under process of trainee selection.
12. Preparation is underway to conduct eight weeks training course for Flight Operation Officer/Flight Dispatcher (FOO/FD).
13. Preparation of syllables on Safety Management System for basic training course as requested by Nepal Airlines Corporation is in process.

Installation of LP Gas Cannon Bird Scaring Device

There has been remarkable improvement in work in controlling bird movement after fixing the LP Gas Cannon Bird Scaring Device in areas adjacent to runaway of internal airports of Biratnager, Janakpur, Simara, Bharatapur,Pokhara, Gautam Buddha and Nepalgunj. This has significantly reduced risks of encounter with birds and helped in unhindered movements of air carriers.

National Aviation Public Health Emergency Preparedness Plan implemented

The Collaborative Arrangement for prevention and Management of Public Health events in Civil Aviation (CAPSCA) assistance visited held from December 2010 to 2012. Keeping reports and recommendation of ICAO regional office into consideration, CAAN in the National Aviation Regulation incorporated ICAO standards for Public Health as subject and endorsement of flight inspectorprocedures.

In order to incorporate the Public health Emergencies in the National Aviation Plan / ATS Contingency and National Aviation Public Health Emergency Preparedness Plan formulated as foundation for ATS Procedure. The National Aviation Public Health Emergency Preparedness Plan has been approved by Director General on 2070/07/29 and is under process to be circulated to the concerned entities. The plan will help address the entire emergency health related problems faced at the international and internal airports.

Fire Prevention and Fire Safety Inspection

On the year 2012/2013 inspection and demonstration programs in the various hub airports and STOL airports were carried out. During the programs this year the RFF personnel from CAAN head office and different airports took actively part in the Installation, Inspection, Orientation and demonstration program along with the staffs of concerned airports.

Tumlingtar Airport: It is the biggest STOL airport of Nepal. Aircraft movements have become busy on this airport as this airport is the gateway to the Makalu/Barun National Park. On the year this airport DCP, CO2 and wheel type fire extinguishers were installed and the fire extinguisher there along with new extinguishers were inspected and checked. Small live demonstration of firefighting procedure was carried out during the program. Approximately 35 numbers of staffs (CAAN, airlines, armed police force, Army and others) actively participated the fire orientation class and live demonstration.

Jomsom Airport: Jomsom airport is the second busiest airport in hilly region after Lukla so there are frequent flights. As there are frequent flights there is the more necessity of fire preventive measures. On this base, 13 fire extinguishers (wheel type 25 kg, DCP 10 kg, DCP 6 kg, CO2 5 kg, CO2 2 kg) were installed at Jomsom airport this year. Existing fire extinguishers there were out dated and unserviceable so it was utmost requirement of the Jomsom airport to be facilitated with fire extinguishers. During the orientation class, approximately 40 personals including CAAN staff participated the fire orientation class. Similarly program was concluded with the live fire demonstration at Jomsom airport (dated 2070 Kartik 10-16).

Nepalgunj Airport: Nepalgunj Airport is the regional hub airport having wider network of air links after TIA, Kathmandu. Having more flights it requires better fire fighting equipments. Along with fire fighting vehicle every airport also need to facilitate it with fire extinguishers as well. This year Nepalgunj airport was facilitated with 17 pieces 5kg DCP, 8 pieces 10 kg DCP, 8 pieces wheel type 25 kg DCP, and 5 pieces 2 kg CO2 fire extinguishers. Installation and inspection program was carried out on this airport this year.

Biratnagar Airport: Biratnagar is the regional hub airport well supported by six STOL airports. This airport links the country with the eastern development region. At Biratnagar Airport there are 25 fire extinguishers including DCP, CO2 and water type. Inspection program was done this year on this airport.

Bharatpur Airport: Bharatpur airport makes the confluence for the east bound and west bound surface travelers. From the few past years it has grown more significant. This airport is facilitated with 15 fire extinguishers although the number of fire extinguisher in this airport is not adequate on the basis of aircraft movements. Inspection program was carried out this year.

Simara Airport: Simara is the closest station from Kathmandu. Air traffic movements have been continuously increasing in this airport as it links the country with the Indian boarder and different commercial points of Nepal. Regular inspection of existing fire extinguisher was performed this year.

Dhangadi Airport: There are 12 fire extinguishers in Dhangadi Airport. One 25kg DCP wheel type fire extinguisher was installed at this Airport this year. Along with installation, fire orientation class was given. During the orientation class, approximately 40 personals including CAAN staff participated the fire orientation class and the program was concluded with the live fire demonstration at Dhangadi Airport.

These types of orientation class and live fire demonstration help in preventing the incident to become an accident. It also enhances the fire prevention and safety measures relating to any types of fire incidents.

RECORD OF FIRE EXTINGUISHERS IN DIFFERENT AIRPORTS OF NEPAL

| S.No | Airport | Fire Extinguisher | Remarks |
|------|---------------|----------------------|---------|
| 1 | Nepalgunj | Co2 2 kg | 2 |
| | | Co2 4.5 kg | 3 |

Flight Inspection System & Recommendation for FM

1. Flight inspection is a maintenance activity that ensures radio navigational aid signals in space meet the required standards which confirms to the provisions of ICAO Annex 10, Vol. I and Annex 14. Vol. I, the related manuals, and the associated procedures meet the relevant provisions of ICAO Doc 8168.

CNS P&D Department conducted Flight Inspection in March-April 2013 to check Radar, DVOR, DME, NDB, Locators and PAPI of TIA and various domestic airports.

The FIS 2013 was conducted to check the coverage of RADAR at TIA. Vertical Coverage Check at an altitude of 14,500.00 feet for both ASR/SSR; Six different airways route coverage check; 17 radar fixes and 3 orientation fixes; and the communication system related to these systems were checked. The coverage of secondary radar was found to be up to 55.5 NM at 14,500ft.

The DVOR and DME of TIA, Simara, Nepalgunj, Bhairahawa, Biratnagar and Pokhara CAO as well as the DME of Pokhara CAO was checked during the period.

The NDB and locator (Nalinchowk /Thecho) of TIA, Janakpur, Nepalgunj, Bharatpur, Biratnagar were checked.

The GNSS procedure flyabilityBiratnagar&Bhairahawa were checked.

In visual aids, the PAPI of Kathmandu, Bhairahawa, Biratnagar, Chandragadhi, Dhangadhi, Janakpur, Nepalgunj, Pokhara, Simara, Surkhet and Tumlingtar were checked and necessary adjustments were done during that period.

2. Taking into consideration the issues of flight safety and airways route, CNS P&D Department in co-ordination with ATM Department and Aerodrome Engineering Department provides recommendation letter to Ministry of Culture, Tourism & Civil Aviation for the establishment of FM towers and tall antenna masts/buildings of commercial sectors. CAAN recommends the establishment of such towers on condition that if there is interference in the aviation frequency or any disturbance in the air routes, the towers need to be relocated or shutdown.

TRI Party MOU

- (i) Civil Aviation Authority of Nepal and the Nepal Department of Hydrology and Meteorology signed Memorandum of Understanding (MoU) on 2070, Shrawan 14 to exchange information on Aviation Meteorological Service. Nepal Department of Hydrology and Meteorology has helped in promoting safe air service by providing (METAR/SPECI/TAF/SIGMET/ROUTE FORECAST) Aviation Meteorological Service for Tribhuvan International Airport and other internal airports keeping provision of ICAO AND WMO into consideration.
- (ii) Civil Aviation Authority of Nepal, the Nepal Department of Hydrology and Meteorology and Weather new Inc.Japan signed a joint MOU on Installation of Weather Equipment to enhance weather forecast

& to Air Navigation Support on 10 October 2013. Live Camera installed in the TIA and Pokhara airport while work underway to fix live cameras in Simikot and Tenjing-Hillary airports. Established in 1986, the Weather new Inc. Japan has been providing Aviation Meteorological Service in many cities. The company has been using hi-tech devices like Live Camera, Radars, Sensors and Lightening Dictators to read cloud and its height, visibility, humidity and various other meteorological services. These efforts are expected to be helpful in preventing air related accidents, especially in places like Pokhara, Lukla known for their unpredictable weather condition, by feeding real time information.

Hazard Identification & Risk Assessment Workshop

Hazard Identification & Risk Assessment Workshop held on 9 – 11 Dec. 2013, first time at Kathmandu Nepal just has been completed successfully. The workshop was organized by Co-operative Development of Operational Safety and Continuing Airworthiness program COSCAP-SA and hosted by Civil Aviation Authority of Nepal (CAAN). There were twenty one participants from different countries of South Asia, as well as forty three participants from all domestic airlines including fixed wing and rotor wing operators. Similarly there were twenty five participants from CAAN. The workshop was inaugurated by Secretary of ministry of Culture, Tourism and Civil Aviation Mr. ShusilGhimire and was addressed by Director General of Civil Aviation Authority of Nepal Er. Ratish Chandra LalSuman.

The Three days workshop was very fruitful with respect to the fact that safety is the most challenging issue in aviation industries of the region and concerned stake holders are responsible to mitigate those risk and hazard factors. The workshop prompted us to ponder on the issues like how we are able to meet those challenges and what will be the tools to ingenerate preventive and reactive actions. It focused to review our procedure or redesign the structure in concerned matter whenever necessary. We have to learn from past unfortunate experiences and need to commit that accident and incident will never happen in the same way in future. Most of the things in aviation industries in South Asia region are almost same, hence are of common interest in hazard identification & risk assessment. If we sincerely make some positive efforts jointly, it will assist us to improve the aviation safety level in this region. Our ultimate goal is to assure the safe sky to this region.

Workshop on ‘Wildlife Hazard Management at Airport’

Wildlife activities at TIA have significantly dropped in the recent days as most of the immediate measures are being taken more effectively. Short, mid and long term plans have been prepared with an objective of minimizing wild life hazard at airports. A seminar on wildlife Hazard management at Airport was conducted by TIACAO, CAAN in Kathmandu on 17-18 August, 2013. Representatives from India, Japan & Bangladesh actively participated in the program. Likewise, a work shop on Bird/ wildlife Aircraft strike Hazard (BASH) was conducted in collaboration with USA air force, from 24th to 27th September 2013. In conclusion, Bird strike problem cannot be controlled by a single unit. Good co-operative and effective coordination is required from the stakeholders and all concerned. Moreover, wildlife hazard cannot be wiped out but it can be minimized if better measures are taken.

Workshop on Risk Assessment

A workshop on "Risk Assessment & Mitigation for Nepal's Aviation safety" was jointly organized by the Civil Aviation Authority of Nepal (CAAN) and International Finance Cooperation (IFC) - the specialized agency of world Bank .The workshop was held at Kathmandu on 29th November 2013 with the discussion on the Nepalese Civil Aviation focusing especially on aviation safety and concluded with the determination of developing and initiating a self regulatory system i.e. "Nepalese Aviation Audit system" for operational system. The said system is similar to IATA Operational Safety Audit (IOSA). The system consists of defined operational procedures and standards with the representative of national regulatory body – the Civil Aviation Authority of Nepal and will work in close co-ordination with international organizations such as ICAO and EU.

Administrative MOU

Administrative MOU with PACOM

For the effective Management of disaster and emergency situation like Crash rescue firefighting, CAA Nepal entered in Administrate Agreement (MOU) with United Stated pacific command (PACOM) On 15th November2013 concerning Project Nepal HA-2012-20342. The MOU concerns the US pacific command (PECOM), US office of defense co – operation in Nepal, civil Aviation Authority of Nepal Federal Democratic Republic of Nepal (FDR), Us Army corps of Engineers, Alaska District (USACE) and US Government Design-Build Construction and Quality Assurance Contractors for the referenced project. This project has been approved and funded by Pacific Command under its Human Assistance (HA) Mission. The project plans to construct a new crash Rescue and Fire Station Building and a deep tube well including an Emergency Generator Building in Tribhuvan International Airport. The project has been co-ordinated through the Civil Aviation Authority of Nepal and FDR and will be developed under the preview of USACE. The project will meet all applicable Nepali construction codes including Earth Quake design Criteria.

MOU With Incheon International Airport Co-operation

An airport industry essentially needs qualified and competent Professionals to maintain and improve its services encompassing the Safety and facilitate quality human resources. CAAN has been providing training abroad –Specially in the areas of Communication, Navigation, Surveillance, Air Traffic Service Aviation Safety, Aviation Security etc. In that course CAAN has entered in Memorandum of Under Standing (MOU) with Incheon International Airport Corporation INC (IIAC), Republic of South Korea on 12th September 2013. The MOU will remain effective for 3 years from date of Signature. The objective of the MOU is to expand the Scope of exchange programmes for producing more effective and valuable results for CAAN. AS per the MOU IIAC will provide five working days training at special rate, CAAN is required to bear the air fare and travel expenses for twenty or more trainees per year. Besides, twenty IIAC Fellowship training opportunities will be made available on priority basis to CAAN Officials as committed by IIAC.

Status on Air Transport Capacity Enhancement Project

[As of 20 December 2013]

A) Recruitment of Consultants :

Both consulting services – Detail Design and Construction Supervision and Capacity Development of CAAN have been procured and under implementation in the project.

Table 1: Consulting Services of ATCEP (Grant No. 0181 – NEP)

| S.N. | Consulting Services | Consultant | Date of Contract Agreement | Date of Mobilization | Duration of Services |
|------|--|---|----------------------------|----------------------|----------------------|
| 1 | Detail Design and Construction Supervision | Japan Airport Consultants, Inc, Japan in association with GEOCE Consultants (P) Ltd | March 09, 2011 | April 29, 2011 | 60 months |
| 2 | Capacity Development of CAAN | INECO-Pointec-ERMC | December 22, 2011 | March 6, 2012 | 36 months |

B) Procurement of Goods and Works :

The ICB contracts for the project works have been procured and under execution in the project.

Table 2: Works and Equipment Contracts of ATCEP (Loan N0. 2581 –NEP)

| S.N. | Goods and Works | Contractor | Date of Contract Agreement | Commencement Date | Duration of Contract |
|------|---|----------------------------------|----------------------------|--------------------|--------------------------------|
| 1 | ICB- 01: Airside Infrastructure Development and Landside Terminal Improvement at TIA, Simikot and Rara Airports | Constructora Sanjose S.A., Spain | December 21, 2012 | March 17, 2013 | 36 months +(DNP, 12 months) |
| 2 | ICB- 02: Supply and Installation of CNS and ATM Equipment at TIA and Lukla Airport | EMTE Sistemas S.A.U., Spain | August 1, 2012 | September 17, 2012 | 15 months +(DLP, 18 months) |

C) Progress of Consulting Services :

- (i) Detail Design and Construction Supervision. The design and procurement of contracts were completed in December, 2012. The construction supervision of ICB-02 was started from September, 2012 and of ICB 01 from March 2013.

Progress as of 30 September 2013 is 48.39 %.

- (ii) Capacity Development of CAAN. Components on Planning, Private Sector Participation, and Enhancing Non-aeronautical Revenues are almost complete, while Corporate Business Planning, Restructuring, HRD Computerization Plan and MIS are in development stage. The preparation of new integrated act is in advanced stage.

Progress as of 30 September 2013 is 47 %.

D) Progress of Contracts :

- (i) Contract Package ICB-01: The contractor has mobilized a number of key staff including Contractor's Representative, chief engineers and architect. The contractor has started some physical works in A04 (Parallel Taxiway and International Apron), A03 (Runway Extension) and A12-8 (under A12 – Ancillary Work) but progress has been sluggish due slow preparation of the contractor.

The cumulative physical progress is 3.83% against the Contractor's program.

- (ii) Contract Package ICB-02: The progress of this contract is satisfactory. The progress of the contract in the reporting period is 12% with cumulative progress is 77%, which is almost close or slightly ahead than work schedule. During the period, main activities of the contractor were supply of meteorological equipment and continue with installation and testing of various equipment and console at TIA and establishment of VAGS and A-PAPI equipment at Lukla airport.

Progress as of 30 September 2013 is 77 %.

E) Overall Progress of ATCEP

The overall progress of all the components of ATCEP is about 30.15%.

Airport Profile

CIVIL AVIATION AUTHORITY OF NEPAL

AIRPORTS IN OPERATION

| S.N. | Airports Name | Zone | District | Elevation | Runway Dimension | | Services | Com. & Nav/other Facilities | Movement P/Y | | Budget (2070/07/1) | Last year Income |

Finance

Finance

CAAN is a self-governing government body which maintains its accounts under accrual basis. The main income sources of CAAN are the service charges and royalty that it gets from airport and air navigation operations. It is VAT registered organization. CAAN regularly deposits the VAT it collects from its financial transactions. Similarly, it pays the income tax out of its operating profit in stipulated time period.

* Half Yearly Figure

The above table clearly showed that despite continuous downturn from FY 2066/056 till 2059/060, the positive profit comeback from FY 2060/061. In 2065/066, the Nepal Govt. has decided to convert 10.25% redeemable preference share into Loan and interest is charged from the initial period .On the same time other decision has been taken place of rebate in tune of Rs. 80 million to NAC. Therefore, there was very high amount of loss in the FY 2065/066. After that the CAAN has making the net profit in every year. Above table showed that the CAAN has achieved the first time cumulative profit in 2068/069. The cumulative gain till F/Y 2069/070 is Rs. 1762.19 million.
